

Temperature Monitoring

Business Sector:
Food Manufacturer

£5,750.00 Saved
23 Months ROI

FACCENDA (Cherry Valley Foods)

“
Since the installation, we have removed the old chart recorders and are saving over 6hr per week in labour
”
Robert Stevens - Engineering manager

Faccenda are a leading UK food business delivering quality fresh and convenience food solutions to the UK retail and food service sectors every day. With a turnover of more than £500m+, they are one of Britain's largest privately owned businesses.

Project Objectives

Customer needs:

- ✓ Address CRC commitment
- ✓ Simple to use dashboard
- ✓ Reduce operating costs
- ✓ Quick payback

Project Outcomes

£5,750
saved in labour & materials costs

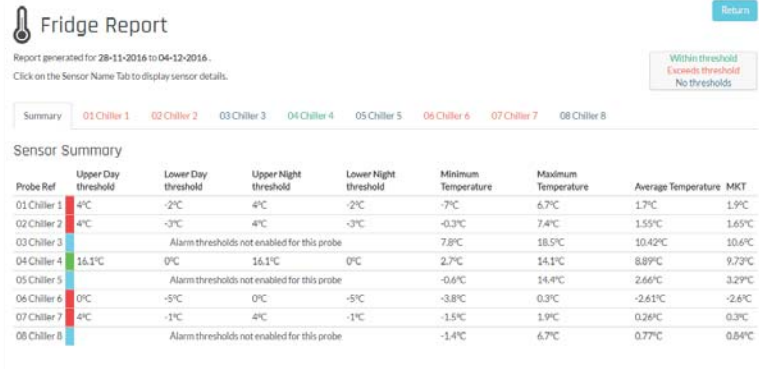

23 months
Return On Investment

Fully Expandable
for site monitoring

The Invisible Systems automated Monitoring and Compliance reporting solution, provides Faccenda with a highly reliable system which has proved accurate every time calibration is checked. The easy to access cloud based dashboard and reporting suite providing historically evidence of temperatures is invaluable.

“Based on the high reliability of the solution, we have recently expanded the system to monitor effluent plant levels and flows”

Monitoring and Compliance Reporting

Invisible Systems designed, supplied and installed a temperature reporting system, for BRC compliance, comprising of 17 food grade, RF Wireless temperature transmitters.

Temperatures are monitored continuously and data is uploaded in real time to our cloud based software and reporting suite, Realtime-Online™. The system has eliminated the need for the existing chart recorders, charts and manual temperature recording.

Benefits

- Threshold exceptions by email
- Automated HACCP Reporting
- Reduced operating costs
- UKAS calibrated sensors
- Fully traceable audit log
- Eliminate stock loss
- Validated process

Invisible Systems is a software & electronics design manufacturing company that focuses on Energy Saving, Compliance and Asset management via robust RF wireless Monitoring and Energy solutions with our Realtime-Online software management portal.

Our solutions include Energy metering, Critical Asset management, Boiler Control, Water Hygiene & Food temperature compliance, plus general condition monitoring and control.
